## General information

Professional styles are essential for the entertainer on stage. But also when playing at home they make things "round". With the style package "70's/80's Pop", which we offer in cooperation with the style manufacturer **d-o-o (Direct Online Order)**, you now receive 10 additional top styles for your Boehm instrument, based on corresponding styles from the extensive d-o-o program.

For your SEMPRA the experienced entertainer **Martin Rickenbacher** (BÖHM Switzerland) has adapted these styles to the fantastic sounds of the AMADEUS system. The styles - although some of them are title-specific - can always be used flexibly for different music titles. And so that you can start playing immediately, you will receive a SONG with matching global presets for each style in this package.

## Requirements

In order for the global presets to sound exactly as programmed, your SEMPRA should be equipped with the drawbar sound module RealOrgan 2.0 and the DSP extension for Amadeus (Item No. 41115).

If these extensions are not available, some presets may have slight variations if drawbar sounds or effect sounds of the Amadeus (FX sounds) were used.

## Installation

In addition to the styles, this package also includes a SONG bank (Firm SONG Bank 18) with matching global presets.

All data of the package are installed into the instrument from the USB stick with the factory data that belongs to your SEMPRA.

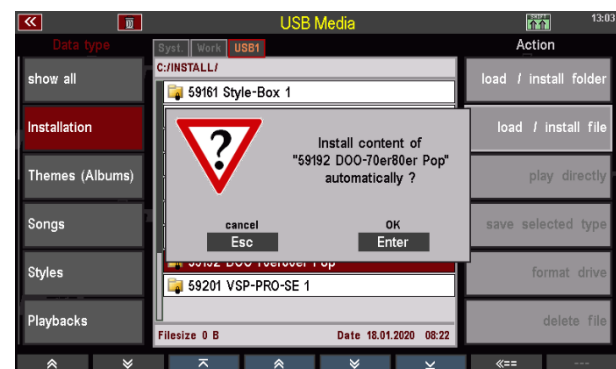

**Attention:** If you have received the package as an "arc" file (archive file) by email, please copy this file first on the PC into the top directory of your factory data stick (or any other USB stick, but it must be formatted on your SEMPRA). When inserting the stick into the SEMPRA the system will recognize the archive file and ask you if the archive should be unpacked. Confirm with ENTER. The installation folder for the package "doo 70er/80er Pop" will now be created on the stick (we recommend that you delete the arc file from the stick after installation, otherwise you will always be asked whether the file should be unpacked when you insert the stick in the future).

You can now continue with the actual installation on the SEMPRA:

- Insert the USB stick with the installation data into one of the USB sockets of your SEMPRA.
- Press the USB button to open the USB menu in the display.
- Tap the **Installation** data type on the left (the field is shown in red).
- Move the cursor to the "**59192 DOO-70er80er Pop**" folder (but do not open the folder!) using the **data-wheel** or the **cursor up/down keys**.
- Tap on the right on the "**Load/Install Folder**" field.

- The display asks if you really want to install the data. Confirm with **[Enter]**.
- The data will now be loaded. Afterwards you can leave the USB menu again (press **ESC** or **USB key**).
- Now first the Styles and then the SONG Bank are loaded (see display). After that the installation is finished. The data of the package can be used.

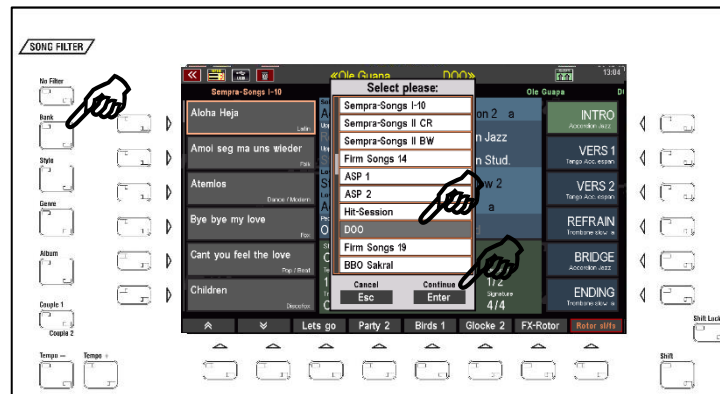

**Attention:** Please note that factory data, including the doo packages, are always installed on an account-specific basis. If you use additional user accounts on your SEMPRA and you want to use the doo styles and SONGS in these accounts, you may have to repeat the installation for these additional accounts!

## Where can I find the data?

The "70's/80's Pop" SONGS with the sample presets can be found in the **Firm SONG Bank 18 "doo"** (internal SONG Bank No. 34). Call up this bank e.g. via the **SONG filter** button [**Bank**] (press 2x if not already selected) and then scroll to the corresponding bank position.

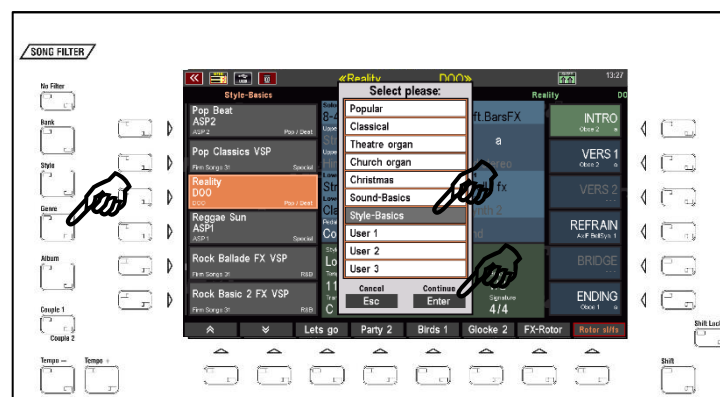

Confirm with [**Enter**]. The SONG list on the left of the display now shows the **doo** SONGS.

Alternatively, you can select the **STYLE BASICS** genre for the SONG list. All **doo** SONGS are assigned to this genre.

Press the SONG filter button [**Genre**] (press twice if not already selected) and select the "Style Basics" genre from the list.

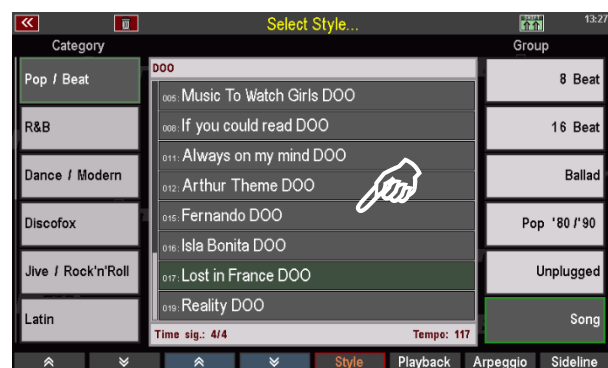

Confirm with [**Enter**].

The SONG list on the left now shows the SONGS of the genre "Style Basics", here among others the **doo** SONGS.

SONGS of doo packages can be recognized by the abbreviation **DOO** in the SONG name.

The **doo-STYLE**s occupy the Firm Style Bank 15 (DOO). They are assigned to the corresponding categories and subgroups in the style selection. DOO styles can be recognized in the style selection by the abbreviation "**DOO**" in the style name.

## Overview Style Package doo 70's/80's Pop

### STYLES (Firm style bank 15 doo)
