## General

We are glad that you extend your SEMPRA 3.0 with the **STAR COLLECTION** software. Our artists have put together a lot of material. The **STAR COLLECTION 1...2** packages each contain 32 styles, which now also use the fantastic **Guitar Strumming Plus** technology (GST+) and the fantastic sounds and drum kits of the **Pro-Lib** sound library.

For each Style there is a SONG with 4 Style-Basic registrations (One-Touch Presets). From **STAR COLLECTION 3** onwards, the styles use the new GST templates, which were also developed for the arpeggiator from spring 2025 onwards. Each style contains two bridges and two breaks without exception, and they are mostly recorded in an 8-bar scheme. The included registration suggestions use the arpeggiator in its new "pro" version, and many of these presets already contain arpeggios for the SEMPRA **Arpeggiator pro**.

The STAR COLLECTION styles are generally very universal. Some of the Intro and Ending patterns for variations 3 and 4 are based on popular tunes. Some styles have special features. For example, it can happen that in variation 1 no bass is played in order to have a longer intro, or in other styles a variation is used as a so-called "bridge" (comparable to the middle section or trio in a song). Such a "bridge" seems to take an inappropriate special position within the 4 variations at the first moment. But if you play a suitable title you are happy to have a suitable accompaniment for this special passage. In the "Disco Fox"-style "Howard Medley" only the fourth variation is a triplet rhythm. If you now play a Howard Carpendale medley, you can use the fourth variation for "Hello again".

Surely you will notice when listening to the styles how much detail work has gone into the instrumentation of the intros and endings to variations 3 and 4. Your SEMPRA 3.0 can use separate playing parameters for intros and endings. This is especially interesting for highlighting certain leading elements of the arrangements only in the intro or ending. Often this has been applied in the form of timbre change, dynamic gradation, change of range, reverb content, etc.

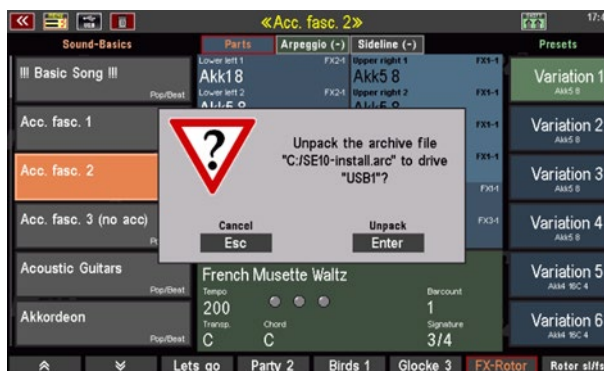

## Installation

The **STAR COLLECTION 3** styles and SONG registrations are installed from the USB stick belonging to your SEMPRA with the factory data into the instrument.

**Attention:** *If you have received the package as an "arc" file (archive file) by email, please first copy this file on the PC into the top directory of your factory data stick (or another USB stick, which must however be formatted on your SEMPRA).*

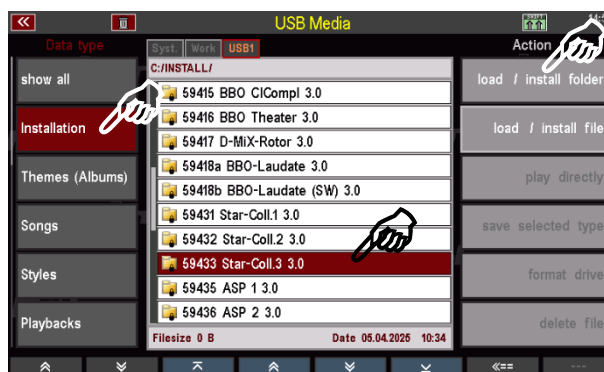

When you insert the stick into the SEMPRA, the system recognizes the archive file and asks you whether the archive should be unpacked.

Confirm with **ENTER**. The installation folder for the "**STAR COLLECTION 3**" package is now created on the stick (we recommend that you delete the arc file from the stick again after installation, otherwise you will always be asked whether the file should be unpacked when you insert the stick in the future).

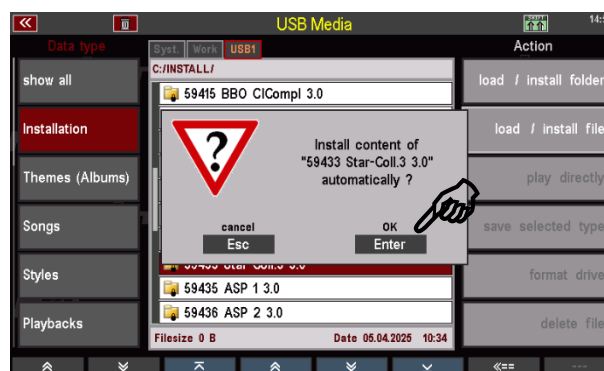

You can now proceed with the actual installation on the SEMPRA:

- Insert the USB stick with the installation data into one of the USB sockets of your SEMPRA.
- Press the **[USB]** button to open the USB menu in the display.
- Tap the **Installation** data type on the left (the field is displayed in red).
- Place the cursor on the "**59433 Star-Coll.3 3.0**" folder using the data wheel or the up/down cursor keys (but do not open the folder!).
- Tap the "**Load/Install folder**" field on the right side.

- The display asks whether you really want to install the data. Confirm with **[Enter]**.
- The styles are now loaded. You can then exit the USB menu again (press the **[ESC]** or **[USB]** button).

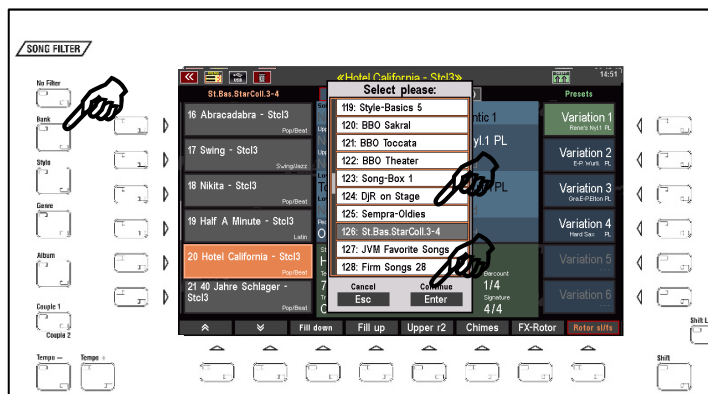

- You can then exit the USB menu (press the **[ESC]** button or the **[USB]** button).

**Attention:** Please note that factory data, including the STAR COLLECTION packages, are always installed on an **account-specific** basis. If you use additional user accounts on your SEMPRA and the STAR COLLECTION styles are also to be used in these accounts, you may have to perform the installation again for these additional accounts!

## How to find the SONGs and Styles of the STAR COLLECTION 3?

The "STAR COLLECTION 3" SONGs with the example presets can be found in the **Firm SONG Bank 26 "St.Bas. Star-Coll. 3/4"**. Call up this bank e.g. via the **SONG filter** button **[Bank]** (press 2x, if not already selected) and then scroll to the corresponding bank position.

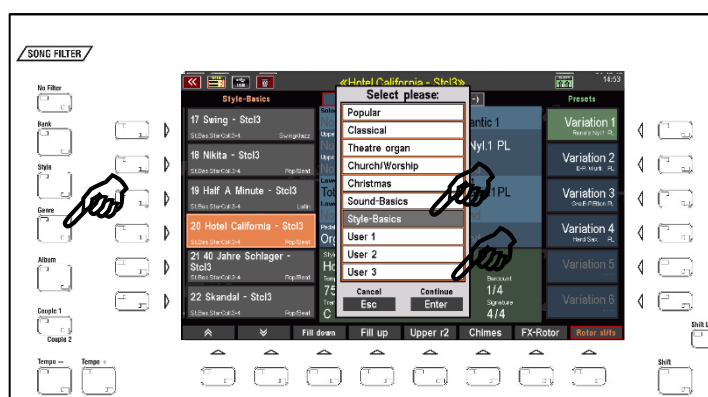

Confirm with **[Enter]**. The SONG list on the left of the display now shows the **STAR COLLECTION** SONGs.

Alternatively, you can call the **STYLE BASICS** genre for the SONG list. All **STAR COLLECTION** SONGs are assigned to this genre.

Press the SONG filter button **[Genre]** (press 2x if necessary, if not already selected) and select the genre **"Style Basics"** from the list.

Confirm with **[Enter]**.

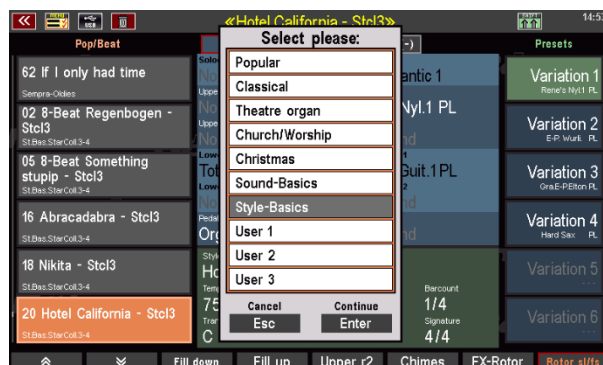

The SONG list on the left now shows the SONGs of the genre "Style Basics", here among others the **STAR COLLECTION** SONGs.

SONGS of the STAR COLLECTION packages can be recognized by the abbreviation **Stcl1**, **Stcl2** or **Stcl.3** in the SONG name.

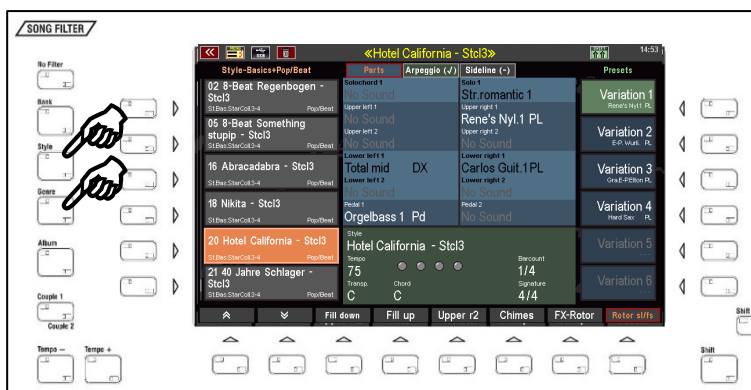

You can find the **STAR COLLECTION** SONGs also with activated genre **"Style Basics"** and together activated SONG filter buttons **[STYLE] + [GENRE]**:

- First, tap the SONG filter button **[Genre]** twice. The list for selecting the SONG genres appears in the display.
- Select the Style Basics genre here and confirm with **[Enter]**.

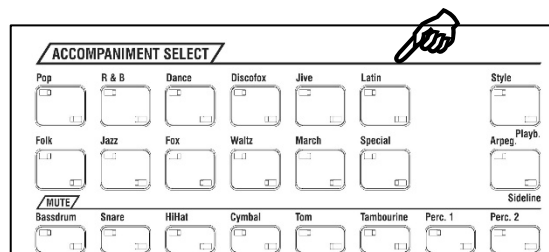

- Now switch on the two SONG filter buttons **[Style]** and **[Genre]** in combination (the LEDs in both buttons light up).

- The SONGs now appear in the SONG lists of the corresponding accompaniment categories, which you can select via the 12 category buttons in the **ACCOMPANIMENT SELECT** group.

The **STAR COLLECTION** styles occupy the firm style bank **18 (Star Collection 3-4)**. They are assigned to the corresponding categories and subgroups in the Style selection.

Styles of the **STAR COLLECTION 3** can be recognized by the abbreviation "Stcl3" behind the style name.

## Arpeggios in STAR COLLECTION registrations

Many SONG presets of the new STAR COLLECTION GST now also contain arpeggios from the pool of the factory arpeggio banks 1...3. Attention: These arpeggios will only sound if the app **SEMPRA Arpeggiator** or **Arpeggiator pro** is installed on the SEMPRA.

Registrations with a stored arpeggio can be recognized by a check mark at the top of the Arpeggio field of the basic screen after being called up:

Attention. The arpeggios are not always active immediately with the preset call. But they can be switched on at any time and then play along.

## GST Plus in STAR COLLECTION styles

The STAR COLLECTION styles also use the Böhm **GST** guitar technique with authentic guitar strummings and runs.

You can recognize the GST tracks in the Style Editor by the **Chord** parameter, under which the respective fingering or playing technique used is listed.

In addition, the new **GST Plus** guitar fingerings have also been used in many styles of the STAR COLLECTION. Here, the "guitarists" of the accompaniment also play chords in which only the lower or only the higher strings of the guitar are strummed.

## Overview STAR COLLECTION 3 for SEMPRA 3.0 Pro-Lib

### Styles in Firm Style bank 18 "Star Collection 3-4"

### SONGS in Firm SONG Bank 26 "St.Bas. Star-Coll. 3/4"

Bank	Number	Name
118	001	Munic party wiedersehen - Stcl3
118	002	8-Beat Regenbogen - Stcl3
118	003	Cha Cha A Night - Stcl3
